## About us

Insung Bio, formerly known as Insung Natural, is a Korean-based company, which manufactures and exports functional all-natural health supplements, cosmetics, toothpaste, and soap. Since the launch in 1985, the company has developed and produced over 25 items and has over 30 offices internationally. We are branching out even as we speak.

Our products were even further validated when our products were approved by the FDA. Even during the worldwide economic downturn, Insung Bio did not cease to research and develop to produce our products. For one product to be made, Insung Bio spends 7-8 years of research and 4-6 years of clinical tests to manufacture a single product.

Our company follows strict principle of 'ethical management' since that is the principle our CEO, In-Chun Shon, initiated when she founded the company. Insung Bio is rooted in Oriental medicine and strives to achieve healthy lifestyle by re-energizing and removing toxins from the body.
